Amendments to the Specification

Please amend the paragraph beginning on line 16 of page 6 as follows:

In the meantime, when a person's name is expressed in various languages, diversity of expression increases in proportion to the number of languages. In addition, content description information can be repeatedly shown in <u>various expressions. Accordingly, it is desirable to have a system and method which recognizes</u> ~~one data, accordingly recognizing~~ the same semantic information ~~variously~~ expressed <u>in various ways using a single data representation</u> ~~as one information is very important~~.

Please amend the paragraph beginning on line 15 of the specification as follows:

As <u>previously</u> described, ~~in the~~ related art, ~~all the user adaptive~~ multimedia services <u>reflect</u> ~~reflecting~~ user preference<u>s</u> ~~depend~~ <u>based</u> on a result <u>obtained by</u> ~~of a~~ matching ~~between~~ user preference information and content description information <u>describing</u> ~~of~~ multimedia data.
